Work experience

Eau de Web – PHP Junior Web Developer
Sept '23 – Present

Full time
Hybrid
Bucharest, RO

- I moved from an internship to a full-time junior developer role because I was passionate about the projects I was involved in and the technologies used by the team, which allowed me to increase my professional development.
- The most enjoyable project for me was EU-Parc. You can view my contributions at github.com/eea/eu-parc.

Eau de Web – PHP Web Developer Internship
Jun '23 – Sept '23

Full time
Hybrid
Bucharest, RO

- Assisted in implementing new features and functionalities on mostly open-source software for over 20 public EU and UN agencies, used by millions of citizens worldwide.
- Conducted thorough testing and debugging to ensure optimal website performance and user experience.
- Actively contributed to the Drupal community by developing custom modules and updating existing ones that you can check on my profile.

Education

'22 – Present

National University of Science and Technology Polyethnic of Bucharest, Faculty of Engineering in Foreign Languages, Bucharest, Romania

- Bachelor's degree in computer science and engineering (English)
- Coursework: Object Oriented Programming, Operating Systems, Data Structures, Microprocessor Architecture, Databases, Web Programming, Numerical Methods

'20 – '21

Database Design and Programming with SQL – Oracle Academy

Projects

February '23

Online Library – Java, Personal Project, GitHub

- An online library that stores books by their name. A user can add, delete, or search books by their name, also having an auto-complete facility.
- Custom implementation of Trie data structure

November '22

Online visiting card, University Project, GitHub

- An online visiting card platform built using vanilla PHP that allows users to create, customize and share their own digital visiting card.
- Technologies used: HTML, CSS, JavaScript, PHP, MariaDB, Apache2 Server
